Slip-ping

If there's one thing we've learned here at Atlanta Clay - it's to dream BIG. If you're ready to dream big - as in taking your work to a whole new size zip-code then you have to get the right clay. Ever use a paper clay? Then maybe you should try some! Like Laguna's B-Mix with paper *and* grog - the best of both worlds for building large and for staying in charge. Builds fast, repairs easily and is super light!
